EDUCATION

Sister Nivedita University, Kolkata

2022 – 2025

Bachelor of Computer Applications CGPA: 9.16

Kolkata, West Bengal

Courses: Data Structures, Operating Systems, Computer Networks, Object Oriented Programming, Database Management System

EXPERIENCE

Aris - Agent Zero

Nov 2025 – April 2026

Role – Lead Backend Developer (Contract)

Remote

- Architected and scaled backend for a Web3 platform with real-time events, AI content, and on-chain USDC rewards.
- Designed and shipped 130+ REST APIs across auth, events, rewards, and analytics; built analytics pipelines for tracking user activity, reward distribution, and real-time event flows using Node.js, Prisma, and PostgreSQL.
- Implemented wallet-based auth (Privy, JWT, ERC-4337), real-time systems (Socket.IO), gasless transactions via Pimlico paymaster, and bot protection (Cloudflare CAPTCHA) with scheduled on-chain reward distribution.
- Dockerized services and deployed backend on a DigitalOcean Droplet, managing production infrastructure and releases.

SKILLS SUMMARY

Languages: Python, C, C++, JavaScript, Rust, Java, Solidity

Web & Blockchain: React.js, Next.js, Tailwind CSS, Bootstrap, MongoDB, Express, ethers.js, Wagmi, IPFS, The Graph, Envio

Tools & DevOps: Git, Docker, Socket.IO, VS Code, Postman, Hardhat, Arcjet, Inngest, Pinata, Alchemy

AI/Automation: Gemini AI, OpenAI APIs, Nodemailer

PROJECTS

Stellalpha  | Solana, Next.js, Rust, Anchor

Oct 2025 – Present

- * A non-custodial automated copy-trading protocol on Solana that mirrors elite trader activity in real time.
- * Built the non-custodial vault system using Solana PDAs and contributed to the core copy-trading execution logic.
- * Showcased at Hack2Launch and StableHacks, with a live MVP and native token (\$STLA) launched via Cyrene AI.

Mizu Pay  | Solidity, Next.js, Envio, Browser Extension

Oct 2025 – Present

- * Built a decentralized checkout platform for real-world payments using Celo stablecoins.
- * Integrated extension, DApp, and Envio-based on-chain payment tracking with Supabase backend.
- * Won 2nd Prize at the Build On Celo Hackathon by Rise In – Kolkata.

Unzap Contract Lab  | Starknet, Cairo, Next.js, Starkzap SDK, Docker

April 2026 – Present

- * Built a browser-based Dev Studio for Starknet with one-click contract templates.
- * Implemented Dockerized Cairo compilation and gasless deployment using Starkzap SDK + AVNU Paymaster.
- * Enabled automatic generation of Next.js starter apps from deployed contracts for instant frontend integration.

CERTIFICATIONS

- **HackerRank Certifications:** Advanced SQL, React.js, and Java.
- **XPro Program on Cybersecurity:** API Testing by Employability.life in collaboration with Federation University Australia.

POSITIONS OF RESPONSIBILITY

- **Web Dev Team Lead, Skepsis Tech Club** (2024–25): Led development of internal platforms and official website.
- **Web Team Member, Zero Day Alliance** (2024–25): Built and maintained the official cybersecurity club site.
- **Guru (Educator), Web3 Wizards** (2024–25): Conducted smart contract workshops; onboarded students into Web3.

ACHIEVEMENTS

- **2nd Place – Core Hacker House India** (\$1500) 
Built “Coro Tashi”, a liquid staking protocol on Core Chain.
- **1st Place – MetaMask Dev Cook-Off** (\$3000) 
Developed “Linea Legacy”, a decentralized solution for securing and passing on digital and educational assets.
- **Winner – Two Tracks, Loops Hacker House** 
Built GrassDotFun, a decentralized betting platform; won 3rd Prize in NEAR (\$500) and Golem DB (\$300) tracks.
